# KUBOTA ZERO-TURN DIESEL GARDEN MOWER

A hybrid zero-turn mower that combines ultra-manoeuvrability with ultra-efficient, Two-Blade Glide Cut rear discharge for higher productivity.

GZD15

**We combined the best of both worlds to create a zero-turn mower that delivers incredible Efficiency, Endurance, and Ergonomics.**

The ultra-maneuvrability of our zero-turn mower. The ultra-efficient operation of our rear-discharging, Two-Blade, Glide Cut mower. We combined these two essential features with a long list of others to create an economical, high-performance zero-turn mower — the hybrid Kubota® GZD15. And with its ability to deliver a high level of efficiency, endurance, and ergonomics, it's no wonder the GZD15 has become the most popular choice of both professionals and non-professionals alike.

DIESEL GARDEN MOWER**

**GZD 15**

The GZD15 zero-turn mower. Lets you finish the day's job faster so you can be

# Efficiency

Impressive results quickly and economically.

## The Glide Cut Rear-Discharge System

Unlike other side-discharging collecting mowers that use a power-draining turbine, by employing Kubota's unique Glide Cut System, our GZD15 smartly utilises its two blades to cut, and then channel directly into the integrated rear grass catcher.

## The Zero-Turn System

For incredibly nimble navigation, especially in and around flowerbeds, trees, and hedges, the Zero-Turn System provides the GZD15 with an easy-to-operate, dual-levered steering that has a 360-degree turning radius.

## High Traveling Speed

With a top travel speed of 13.5 km/h, you'll cruise from job to job faster. And thanks to the GZD15 zero-turn mower's high cutting performance and fuel-efficient 15 PS diesel engine, you can finish your day's job faster than ever.

## Mower Lifting Height

By utilising a pedal-operated hydraulic lift, the mid-mount mower can be quickly raised up to 135mm to provide higher ground clearance, and lowered just as easily.

## Large Volume Grass Collector

You'll spend less time dumping grass and more time cutting it with our generously-sized, 400-liter grass collector.

## Parallel-Link Grass Collector Lifting System

With the high dump (HD) model, its convenient, hydraulic Parallel-Link System moves the grass collector vertically, allowing consistent, no-spill dumping at variable heights (0.9 m-1.8 m). Adjusting the system downward permits unloading under trees or other obstacles, while adjusting it upward to its maximum height of 1.8 m lets you unload into truck beds.

## Quick Clean System

Our Quick Clean System raises productivity by making it a snap to clear even wet grass without leaving the driver's seat. Simply use the lever to easily clear a path to the grass collector.

Deck cleaning pipe for connecting water hose

## Kubota Diesel Engine

Amazingly rugged and dependable, the GZD15 zero-turn mower's fuel-efficient, 2-cylinder diesel engine lets you run longer with less fuel. Plus, the engine's 15-horsepower rating gives it the brawn to run smoothly for extended periods—while handling even tough jobs.

## Large Capacity Fuel Tank

Requiring less stoppage for refueling, our large-volume, 20-liter fuel tank will keep you operating longer. Combine this with our fuel-efficient, high-torque diesel engine, and you've got the makings for a healthier bottom-line profit.

## Deep Profile Mower Deck

Equipped with a deep mower deck (123.4 mm inner), the GZD15 zero-turn mower cuts faster—in fact, even tall, thick, or wet grass is no challenge.

## Compact and Low Cost

The GZD15's compact and lightweight design makes it one of the easiest mowers to transport. And, loaded with cost-efficient features, it's sure to increase your profit by keeping overhead down.

more productive.

# Endurance

Keeps costs low with rugged, trouble-free operation.

## Shaft-Drive Mower

When it comes to drives, nothing is more enduring than shaft. That's why when we created the mid-mount mowing unit of our GZD15 zero-turn mower, we made sure it would be powered by an amazingly reliable and quiet shaft drive.

## Shaft-Drive Transmission

We didn't stop at just a shaft-drive mower either—for a smoother, quieter, maintenance-free final drive, you can also depend on Kubota's high-volume, shaft-driven HST transmission. Power is transmitted directly from the engine to the HST via a shaft, and from the HST to the tyres by means of a gear train.

## Wet Disc Clutch & Brakes

Our incomparable wet-type, multi-disc clutch is so durable, it'll outlast most others. While our wet-type, single-disc brake provides incredible stopping power for safer operation.

# Ergonomics

Smooth and comfortable operation for less fatigue.

## Independent Steering Levers

Its independent left and right steering levers operate with a light touch to provide the GZD15 zero-turn mower with amazing nimbleness—including a 360-degree turning radius.

## Pedal-Type Brakes

For increased safety, the GZD15's brake pedal enables quick, emergency stopping from just a light touch, to a parking brake by depressing it fully downward.

## Cutting Adjustment Dial

Cutting height can be quickly adjusted by simply twisting the height adjustment dial, which is located within easy reach of the operator's seat. Fine adjustments (1/4-inch increments between 1.0 to 4.0 inches, and 1/2-inch increments between 4.0 to 5.0 inches) are also possible.

## Low Centre of Gravity

With a bulldog-like stance and a low sitting position, the GZD15's low centre of gravity makes it extremely difficult to tip over—even on rough terrain.

# Specifications

Model		GZD15-LD	GZD15-HD	
<b>Engine</b>	Model	Kubota Z602		
	Fuel type	Diesel Liquid-cooled (2 cyl.)		
	Displacement	599 cc (36.5 cu. in.)		
	Power	11.2 kW (15 PS)		
	Fuel capacity	20 l		
	Battery	12V (450 CCA)		
	Alternator	15 Amps		
	<b>Tractor</b>	Mower position	Mid-Mount	
Front axle pivot		Standard		
Type		4Wheels-2WD		
Tyre size Front/Rear		15×6.0-6 / 20.0×10-8		
Tread Front		770 mm		
Rear		950/850 mm 2 positions		
Wheel base		1285 mm		
Overall Length		2785 mm		
Overall Width		1200 mm		
Overall Height		1115 mm	1345 mm	
Weight (w/mower & GC)		510 kg	540 kg	
<b>Drive Train</b>		Speed Front/Rear	0-13.5 km/h / 0-10 km/h	
		T/M drive system	Shaft drive	
	Mower drive system	Shaft drive		
	Drive system	2-HST		
	Steering style	2-Hand Levers		
	Parking brake	Wet multi-discs, Mechanical equalising brake system		
	Turning radius	0 m		
	<b>PTO</b>	PTO clutch	Hydraulic Wet Multi Discs	
PTO brake		Hydraulic Wet Single Disc		
<b>Mower</b>	Cutting width	42" (1067 mm)		
	Lift system	Hydraulic		
	Mount system	Parallel Linkage		
	Blade drive system	Hex belt, gear		
	Cutting height	1-4 in. (1/4"), 4-5 in. (1/2") (25-102 mm (6 mm), 102-127 mm (13 mm))		
	Cutting height adj.	Dial		
	Max. Mower lift height	135 mm		
	No. of blades	2		
<b>Grass Collector</b>	Type	Low dump/Hydraulic	High dump/Hydraulic	
	Capacity	400 l		
	Lift height (MAX)	—	1.8 m (5.9 ft)
